

Opswell

Security questionnaire - summary answers

Architecture

- Automations run in the client's Claude / Anthropic accounts and existing systems.
- Opswell does not operate a multi-tenant vault of client GL / payroll source data by default.
- Marketing site: HubSpot forms; booking: Google Calendar.

Access & people

- Founder-led delivery (Maxwell Kroll); no junior bench / offshore pyramid.
- Access granted only for scoped work; revoked at end of engagement.
- NDA before artifact share; least privilege on systems you authorize.

Controls stance

- Human review remains on postings that affect books / cash / customer data.
- SOX-aware: automation assists; control ownership stays with the client.
- Full detail: <https://opswell.ai/security> and [/security/one-pager](https://opswell.ai/security/one-pager)

Send us yours

- Email your questionnaire to hello@opswell.ai - we reply in writing, usually within one business day.
